Some FlexLink sales organization do not have their customer and pricing data in SAP. For these sales organizations it is possible to use a different approach for configuring pricing.

In order to get price for FlexLink material, a Quotation Tool administrator in the sales organization first needs to do the following steps:

 Create local price list by opening menu Basic Data -> Local data -> Local Price List items (only available to administrators)

File View Quotation	Basic Data	Web Update	Tools	Help				
Quotation information	Local [Data		Sales Responsibles				
Customer	Progra	m parameters	•	Local Vendors	mer No			
Project			_	Product categories		Q	Search	
	Cor	ntact person		Local Modules				
		fault Salutatio	First	Tacton Source Sets	Pho	0.0	Mobile	F.m
		Seldent Seldent	T II SK	Local Price List items			phone	C-111
				Local Curtomerr				

2. You will get the following window, click on Add new button

Price Lis	ts			×
÷ /	Add new			File Activities
Delete	Code	Currency	Margin	Transfer Currency Rate
				Ok

3. Enter price list name, currency, margin and adjust transfer currency rate if you want. The exchange rate is in relation to your cost currency for FlexLink material.

Add new		×
Name SEK PL 50	Currency SEK ~	
Margin 50 %	Transfer Currency Rate	
	Cancel Ok	

4. Now you have added a local price list and you will find it in Quote Information -> customer view

		ion Project

5. Now you can search for FlexLink material. The cost presented will come from SAP and will be the same as the price you see in FlexLink Online Store. If you hover with mouse pointer over the cost you can see it original currency. Sales price will be calculated depending on the margin you have written in the chosen local price list.
